✓ Transient High Frequency Logging Configuration GUI

**When to Enable Transient High Frequency Logging:**

✓ ☒ Run Periodic Detection

- Daily                      time of day    = \_\_\_\_
- Monthly                  day of month   = \_\_\_\_
- Continuous              Polling interval every \_\_\_\_ minutes

✓ ☒ Enable ~~as~~ immediately as response to ALL Error Message (very expensive from a performance standpoint)

✓ ☒ Select Subsystem(s) which error events turn on temporary tracing

Subsystem DropDown:    Directory  
                                  IP Driver  
                                  ORB  
                                  Etc.

**Duration of Transient High Frequency Logging:**

- ✓ ☒ (default) 1 hour after error message
- ✓ ☒ Indefinite until Administrator turns off tracing
